NEW PRODUCT: Spectrum Controls Upgrades the Universal Industrial Gateway, making it a Better Way to Gateway.

Bellevue, WA, Oct. 15th, 2021 - Spectrum Controls has been delivering new and innovative solutions to the industrial controls marketplace for over 35 years, and the newly upgraded Universal Industrial Gateway helps enhance your connected enterprise.

Spectrum Controls is proud to announce the next generation Universal Industrial Gateway, now featuring 2-Ethernet ports, a larger display, and serial adapter cables! Coupled with 12 protocols in 1 box, the Universal Industrial Gateway connects multiple devices across multiple protocols, simultaneously. The browser-based interface means no software to install and deploys in minutes without any PLC code. In systems where the installed base includes Industrial Ethernet and/or serial protocols, the Universal Industrial Gateway saves you time, money, and the headache of configuring multiple gateway devices.
