Press Release

For Immediate Release

Experience Eplan Platform 2026 at Rockwell Automation Fair 2025 Chicago, Illinois – November 17-20, 2025

Eplan Platform 2026 is here, and exceeding industry standards by offering improved standardization, new capabilities for device data management and direct access to more than four million components in the Eplan Data Portal, this release empowers users to work smarter with greater efficiency, accuracy, and collaboration than ever before.

Eplan Pro Panel: A customized view into control cabinets

Users working with control cabinet designs are supported with up to ten different views of projects in Eplan Pro Panel. Customized, application-specific views of the designed control cabinets can be saved and viewed from different perspectives, significantly speeding up the intuitive 3D navigation. The routing from cables has been improved for easier access to projects based on individual needs and specifications.

Eplan Data Portal: Now with direct access

New, direct access from Eplan device management users can now pull device data straight from the Data Portal. Just one click in Eplan Electric P8 will take the user to the component in the Portal where they can immediately download the required project data. The same applies to eStock, the cloud-based device database that also makes maintaining device data a collaborative effort. With more than 400 new properties for devices, including those from Rittal's new RiLineX, to deliver smart designs faster, whether you work in energy, the process industry, or building automation.

Eplan Preplanning: Now with single-line diagrams

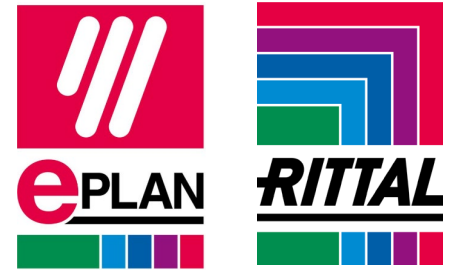

Eplan Preplanning software now supports single-line diagrams, symbols and components can be placed and logically connected – making it easier for engineers to develop connected concepts.

Eplan Software Download Center for more information

The customer has long been the focus of what Eplan does. The www.eplan.com platform is a customer portal that provides direct access to software, tools and lots of additional information. Here users can now find information on the current release of products and individual updates, which allow slightly larger jumps in updates from older versions with just a click. About EPLAN LLC

Eplan is a global leader in software and service solutions for electrical, automation, and mechatronic engineering. Specializing in cutting-edge design software for machine and panel builders, Eplan supports over 68,000 customers worldwide via standardized and customized interfaces to ERP and PLM/PDM systems. As part of the Friedhelm Loh Group along with Rittal, Eplan is dedicated to pushing efficiency, integration, and automation in engineering forward. Learn more at eplan.com/us-en/

About Rittal LLC

Rittal LLC is a global manufacturer of industrial and IT enclosures, racks, and accessories, including cooling solutions and power management systems for industrial, data center, outdoor, and hybrid applications. As the largest manufacturer of enclosures in the world, Rittal provides innovative, high-quality solutions for practically any industrial or IT infrastructure application, from single enclosures to comprehensive, mission critical systems. Products are tested and certified to the appropriate standards that apply, including UL, CSA, ATEX, NEMA, and more. Learn more at rittal.us.
