## Press Release

For Immediate Release

## Eplan Cable proD Revolutionizes Machine Cabling at Rockwell Automation Fair 2024 Anaheim, California – November 18-21, 2024

Eplan is proud to introduce Eplan Cable proD, an innovative software solution that transforms the cabling process for machines, at the Rockwell Automation Fair 2024 in Anaheim. Aligned with the event's theme, "Make It Matter," Eplan Cable proD exemplifies the commitment of Eplan and Rittal to empower entire value chains and connect ecosystems across operations.

Eplan Cable proD simplifies and accelerates the cabling process by digitizing designs and streamlining the entire workflow from concept to production. By providing comprehensive digital schematics, Eplan Cable proD enables engineers to easily plan and implement machine cabling with unprecedented speed and accuracy. This ensures that all necessary information is readily available, which significantly reduces the risk of errors and improves overall project efficiency.

One of the key advantages of Eplan Cable proD is its ability to support the use of prefabricated cables, which enhances the consistency and manufacturing quality of the final product. The software's ability to provide detailed and accurate information for production and assembly means that users can trust the system to deliver reliable results every time.

*"With Eplan Cable proD, we're providing a powerful tool that takes the guesswork out of machine cabling," said Neil Komer, Director of Professional Services, Eplan. "By digitizing the entire process, we're giving our customers the ability to work faster, reduce errors, and ultimately achieve better outcomes."*

Visit Eplan and Rittal at booth A24 during the Rockwell Automation Fair to learn firsthand how Eplan Cable proD can empower your machine cabling process and help your business achieve greater efficiency and reliability. Discover how our solutions are designed to connect your ecosystems and drive your success.

## **Press Release**

**For Immediate Release**

### **About Rittal LLC**

Founded in 1982, Rittal LLC is the fully owned US subsidiary of Rittal GmbH & Co. KG, and is headquartered in Schaumburg, IL. With a main production facility in Urbana, OH, a dedicated Modification Center in Houston, TX, and logistic hubs in Urbana, OH; Springfield, OH; Houston, TX; Sparks, NV; and Atlanta, GA, Rittal LLC is fully committed to providing the United States with quality enclosure solutions.

Founded in 1961 in Germany, Rittal is a global manufacturer of industrial and IT enclosures, racks, and accessories, including cooling solutions and power management systems for industrial, data center, outdoor, and hybrid applications. As the largest enclosure manufacturer in the world, Rittal provides quality solutions for practically any industrial or IT infrastructure application. Rittal is part of the owner-operated Friedhelm Loh Group along with Eplan.

### **About Eplan**

Eplan is a global leader in software and service solutions for electrical, automation, and mechatronic engineering. Specializing in cutting-edge design software for machine and panel builders, Eplan supports 68,000 customers worldwide via standardized and customized interfaces to ERP and PLM/PDM systems. As part of the Friedhelm Loh Group along with Rittal, Eplan is dedicated to pushing efficiency, integration, and automation in engineering forward. Learn more at [eplanusa.com](http://eplanusa.com).
