Eplan Platform 2025 Set to Elevate Project Design Efficiency at Rockwell Automation Fair 2024 Anaheim, California – November 18-21, 2024

Eplan is excited to unveil the latest version of the Eplan Platform 2025, at the Rockwell Automation Fair 2024 in Anaheim. Under the theme, "Make It Matter," the Eplan Platform 2025 exemplifies how Eplan empowers entire value chains and connect ecosystems across operations to significantly boost design efficiency across industries.

The Eplan Platform 2025 introduces groundbreaking enhancements that make schematic creation faster and more efficient than ever before. Key improvements include quicker data availability and greater data depth, allowing users to streamline their workflow and boost productivity. The enhanced data management capabilities now integrate more seamlessly into critical points of the design process, including the properties overview and device management.

One of the standout features of the Eplan Platform 2025 is the integration of QR codes and images directly into schematic symbols. This addition enables more intuitive access to essential information and makes it easier for engineers to navigate complex designs. These innovations ensure that users can create high-quality schematics with greater speed and accuracy to ultimately improve project outcomes.

"Eplan Platform 2025 offers significant improvements in data management and usability," said Neil Komer, Director of Professional Services, Eplan. "These new features have been designed from the ground up to meet the evolving needs of our customers and transform challenges into new opportunities with the highest possible design efficiency."

Join Eplan and Rittal at booth A24 during the Rockwell Automation Fair to explore how the Eplan Platform 2025 can transform your schematic design process and help your business achieve greater operational efficiency. Discover how our solutions can make your work truly matter.

About Rittal LLC

Founded in 1982, Rittal LLC is the fully owned US subsidiary of Rittal GmbH & Co. KG, and is headquartered in Schaumburg, IL. With a main production facility in Urbana, OH, a dedicated Modification Center in Houston, TX, and logistic hubs in Urbana, OH; Springfield, OH; Houston, TX; Sparks, NV; and Atlanta, GA, Rittal LLC is fully committed to providing the United States with quality enclosure solutions.

Founded in 1961 in Germany, Rittal is a global manufacturer of industrial and IT enclosures, racks, and accessories, including cooling solutions and power management systems for industrial, data center, outdoor, and hybrid applications. As the largest enclosure manufacturer in the world, Rittal provides quality solutions for practically any industrial or IT infrastructure application. Rittal is part of the owner-operated Friedhelm Loh Group along with Eplan.

About Eplan

Eplan is a global leader in software and service solutions for electrical, automation, and mechatronic engineering. Specializing in cutting-edge design software for machine and panel builders, Eplan supports 68,000 customers worldwide via standardized and customized interfaces to ERP and PLM/PDM systems. As part of the Friedhelm Loh Group along with Rittal, Eplan is dedicated to pushing efficiency, integration, and automation in engineering forward. Learn more at eplanusa.com.
